9. (Internal Use Only - LLM) Called Robert Vagley, Director, General Subcommittee on Labor, House Education and Labor Committee, on the status and prospects of H. R. 7130 (Fair Labor Standards Amendments of 1972). Vagley said they are at least three weeks away from final action on the bill. He said he had reviewed our paper on the age discrimination provision since we had discussed it on 4 August; felt that there should be no problem in getting agreement on our proposed amendment; and said he would contact us if any problems developed. Vagley understands clearly that there is to be no attribution to us on this matter.

Vagley asked if I could check into the status of a personnel application for him, and I said we would be glad to do so.

10. (Internal Use Only - LLM) Called Mr. Blum, Senate Foreign Relations Committee staff, concerning two outstanding requests. On the review of OSS documents, it was agreed that [] would call him on 28 August. On NIE-5, I explained that I could see that serious obstacles were developing involving at least the legal authority of the Agency to permit outside access to NIEs as a matter of principle. (See Memorandum for the Record.)

11. (Internal Use Only - LLM) Dr. Joseph Thach, House Internal Security Committee, called to ask what progress we are making in determining if we had a log that could be made available to him on statements by U. S. citizens over Radio Hanoi since 1965. I told Dr. Thach the FBIS area books are not indexed and that we did not have a log as such, but were investigating to see if we could develop the information with reasonable effort. Dr. Thach appreciated our efforts and will review his own files with the thought of giving us some time parameters when various U. S. groups visited Hanoi and probably made statements for broadcast.

Later in the day, [] FBIS, responded he was compiling a listing with the understanding that it be made available strictly on a non-attributable basis. I was unable to pass this information on to Dr. Thach as he had left the office, but I left a message for him to call me when he returns on Thursday. [] CIA Librarian, was advised of these developments as he has a recent similar request from the Library of Congress.
